Natural gas generator set
QSK19 series engine
315 kW – 334 kW

Description
Cummins® lean burn gas generator sets are fully integrated power generation systems utilizing state of the art technology that results in optimum performance and efficient use of fuel for Standby and Continuous Duty, CHP and Peaking applications.

Features

Exhaust emissions - Lean burn technology provides exhaust emissions levels as low as 500 mg/Nm³, 1 g/hp-hr NO₂. EPA MOH Tier 2 certification is available on select ratings. Ability to meet EPA NSPS certification.

Fuel flexibility - Ability to run on pipeline natural gas with some alternate fuel capability (refer to data sheet for specific fuel ranges).

Permanent Magnet Generator (PMG) - Offers enhanced motor starting and fault clearing short circuit capability.

Alternator – Selectable voltage and temperature rise with low reactance 2/3 pitch windings; low waveform distortion with non-linear loads, fault clearing short-circuit capability, and class H insulation (see Alternator data sheet for details) and anti-condensation heater.

Control system – The PowerCommand® 3.3 generator set control is standard equipment and provides total genset system integration including full paralleling capability in grid or load share mode, precise frequency and voltage regulation, alarm and statue message display, AmpSentry™ protection, output metering, auto-shutdown at fault detection and a user interface panel installed onto the genset. Optional remote operator panels are also available.

Cooling system - The generator set is equipped with the capability of interfacing with a remote radiator or heat exchanger.

Warranty and service - Backed by a comprehensive warranty and worldwide distributor network that can provide all levels of service from replacement parts to performance guarantee programs.

Note: Some voltages may not be available on all models. Consult factory for availability.

## Generator set options and accessories

### Engine
- NO_x 500 mg/Nm³ (1.0 g/hp-hr)
- NO_x 1000 mg/Nm³ (2.0 g/hp-hr)
- Natural gas fuel methane index as low as 72 MN at full load for some models
- High temperature cooling circuit outlet up to 95 °C (203 °F)
- EPA NSPS compliance capability
- EPA MOH Tier 2 certification

### Alternator
- 105 °C (221 °F) rise alternator

### Control panel
- Remote operator panel with HMI320
- Remote operator panel with HMI420

### Accessories
- Exhaust silencers
- Gas train
- Radiators
- Bladder expansion tank
- Heat exchanger
- Exhaust heat recovery

Note: Some options may not be available on all models - consult factory for availability.
**PowerCommand 3.3 control system**

**PowerCommand control** system is a microprocessor based genset monitoring, metering and control system designed to meet the demands of today's engine driven gensets. The integration of all control functions into a single control system provides enhanced reliability and performance, compared to conventional genset control systems. These control systems have been designed and tested to meet the harsh environment in which gensets are typically applied. Major features include:

- **AmpSentry** protection provides a full range of alternator protection functions matched to the alternator provided.
- Extended Paralleling (Peak Shave/Base Load) regulates the genset real and reactive power output while paralleled to the utility. Power can be regulated at either the genset or utility bus monitoring point.
- Digital frequency synchronization and voltage matching.
- Isochronous Load Share
- Droop kW and kVar Control
- Real time clock for fault and event time stamping.
- Real time clock for start/stop to initiate a test with or without load, or a Base Load or Peak Shave session.
- Digital voltage regulation. Three phase full wave FET type regulator.
- Genset/Engine monitoring and protection.
- Utility/AC Bus metering and protection
- Modbus® interface for interconnecting to customer equipment.

**Operator/display panel**

- Auto/Manual/Run/Stop mode selectors
- Alpha-numeric display with pushbutton access for viewing engine and alternator data and providing setup, controls and adjustment
- Circuit breaker position indication and manual control
- 320 x 240 pixels graphic LED backlight LCD.
- Multiple language support

**Engine protection**

- Engine vitals – oil temperature and pressure, coolant temperature and levels
- Derate
- Configurable alarm and status inputs
- Emergency stop
- Low and high battery voltage warning
- Weak battery warning
- Dead battery shutdown
- Fail to start (overcrank) shutdown
- Fail to crank shutdown
- Cranking lockout

**Engine data**

- Oil temperature and pressure
- Coolant temperature and pressure, HT and LT
- Intake manifold pressure and temperature
- Exhaust temperature and pressure
- Engine electronics temperature and DC voltage
- Gas inlet and downstream pressures, mass flow rate, and control valve position
- Spark advance and knock level/count, per cylinder
- Lube oil status, priming status
- Oil and engine heater status
- Start system status
- Compressor and compressor bypass status
- Auxiliary power supply status
- **AmpSentry alternator protection**
- Overcurrent and short circuit shutdown
- Single and three phase fault current regulation
- Over and under voltage shutdown
- Over and under frequency shutdown
- Overload warning and load shed alarm output
- Reverse power and Var shutdown
- Excitation fault

**Alternator data**

- AC voltage, Line-to-Line and Line-to-Neutral
- Three phase AC current
- Frequency
- Total and individual phase power factor, kW and kVA
- Alternator heater status
- Winding and bearing temperatures

**Other data**

- Genset hardware data
- Data logs – operational data
- Fault history – up to 32 events
- Start attempts, starts, running hours, KW hours
- Engine data – operational data, monitored status functions, auxiliary system inputs, etc.
- Service adjustments - operational, customer configurable set up, calibration, etc.

**Paralleling data, functions and protection**

- Genset and Utility/AC Bus Source AC Metering
- First Start Sensor™ System
- Active Digital phase lock loop synchronizer
- Sync check
- Isochronous kW and kVar load share controls
- kW import/export and kVar/PF control for extended utility (mains) paralleling
- Multiple Genset Load Demand control
- Power Transfer Control
- Breaker Control and status monitoring/warning
- Inputs for remote kW and kVar control

For further detail on PowerCommand 3.3 see document S-1570
Rating definitions

Base Load (Continuous) Power (COP):
Applicable for supplying power continuously to a constant load up to the full output rating for unlimited hours. No sustained overload capability is available for this rating. Consult authorized distributor for rating. (Equivalent to Continuous Power in accordance with ISO 8528, ISO 3046, AS2789, DIN 6271, and BS 5514).

Codes and standards

This generator set is designed in facilities certified to ISO 9001 and manufactured in facilities certified to ISO 9001 or ISO 9002.

Warning: Back feed to a utility system can cause electrocution and/or property damage. Do not connect to any building’s electrical system except through an approved device or after building main switch is open.
