Specification sheet

Diesel generator set
QSK60 series engine
2250 kW 60 Hz
Data Center Continuous
EPA emissions

Description
Cummins® commercial generator sets are fully integrated power generation systems providing optimum performance, reliability and versatility for stationary standby applications.

Features
Data Center Continuous (DCC) - Applicable for supplying power continuously to a constant or varying electrical load for unlimited hours in a data center application.

Uptime Compliant - Meets the requirement of a Tier III and IV data center site by being rated to run for unlimited hours of operation when loaded to 'N' demand for the engine generator set.

Cummins heavy-duty engine - Rugged 4-cycle, industrial diesel delivers reliable power, low emissions, and fast response to load changes.

Alternator - Offers selectable motor starting capability with low reactance 2/3 pitch windings, low waveform distortion with non-linear loads and fault clearing short-circuit capability.

Permanent Magnet Generator (PMG) - Offers enhanced motor starting and fault clearing short-circuit capability.

Control system - The PowerCommand® digital control is standard equipment and provides total genset system integration including automatic remote starting/stopping, precise frequency and voltage regulation, alarm and status message display, AmpSentry™ protective relay, output metering, auto-shutdown at fault detection and NFPA 110 Level 1 compliance.

Cooling system - Standard integral set-mounted radiator systems, designed and tested for rated ambient temperatures, simplifies facility design requirements for rejected heat.

NFPA - The generator set accepts full rated load in a single step in accordance with NFPA 110 for Level 1 systems.

Warranty and service - Backed by a comprehensive warranty and worldwide distributor network.

Generator set specifications

Governor regulation class | ISO8528 Part 1 Class G3
Voltage regulation, no load to full load | ± 0.5%
Random voltage variation | ± 0.5%
Frequency regulation | Isochronous
Random frequency variation | ± 0.25%
Radio frequency emissions compliance | IEC 801.2 through IEC 801.5; MIL STD 461C, Part 9

Engine specifications

Bore | 158.8 mm (6.25 in)
Stroke | 190 mm (7.48 in)
Displacement | 60.2 liters (3673 in³)
Configuration | Cast iron, V 16 cylinder
Battery capacity | 2200 amps minimum at ambient temperature of 0 °C (32 °F)
Battery charging alternator | 55 amps
Starting voltage | 24 volt, negative ground
Fuel system | Cummins’ modular common rail system
Fuel filter | Two-stage spin-on fuel filters and water separator system. Stage 1 has a three element, 7-micron filter and Stage 2 has a three element, 3-micron filter.
Air cleaner type | Dry replaceable element
Lube oil filter type(s) | Four spin-on, combination full flow filter and bypass filters
Standard cooling system | High ambient cooling system

Alternator specifications

Design | Brushless, 4 pole, drip proof, revolving field
Stator | 2/3 pitch
Rotor | Two bearing, flexible disc
Insulation system | Class H on low voltage and medium, Class F on high voltage
Standard temperature rise | 80 ºC Standby
Exciter type | Permanent Magnet Generator (PMG)
Phase rotation | A (U), B (V), C (W)
Alternator cooling | Direct drive centrifugal blower fan
AC waveform Total Harmonic Distortion (THDV) | < 5% no load to full linear load, < 3% for any single harmonic
Telephone Influence Factor (TIF) | < 50 per NEMA MG1-22.43
Telephone Harmonic Factor (THF) | < 3

Available voltages

60 Hz Line-Neutral/Line-Line

- 220/380
- 277/480
- 240/416
- 255/440
- 347/600
- 7200/12470
- 7620/13200
- 7970/13800
- 2400/4160

Note: Consult factory for other voltages.

Generator set options and accessories

Engine
- 120/240 V 300 W anti-condensation heater
- 208/240/480 V thermo-statically controlled coolant heater for ambient above and below 4.5 °C (40 °F)
- Dual 120/208/240/480 V 300 W lube oil heaters
- Triplex fuel filter

Alternator
- 80 ºC rise
- 105 ºC rise
- 125 ºC rise
- 150 ºC rise
- 163 ºC rise

Control panel
- PowerCommand 3.3
- Multiple language support
- 120/240 V 100 W control anti-condensation heater

- Exhaust pyrometer
- Ground fault indication
- Remote annunciator panel
- Paralleling relay package
- Shutdown alarm relay package
- Audible engine shutdown alarm
- AC output analog meters (bargraph)
Generator set options and accessories (continued)

**Exhaust system**
- Industrial grade exhaust silencer
- Residential grade exhaust silencer
- Critical grade exhaust silencer

**Cooling system**
- Standard high ambient temperature (43 °C)

**Operator/display functions**
- Displays paralleling breaker status
- Provides direct control of the paralleling breaker
- 320 x 240 pixels graphic LED backlight LCD
- Auto, manual, start, stop, fault reset and lamp test/panel lamp switches
- Alpha-numeric display with pushbuttons
- LED lamps indicating genset running, remote start, not in auto, common shutdown, common warning, manual run mode, auto mode and stop

**Operator panel features**
- PowerCommand 550 remote monitoring system
- Batteries
- Battery charger
- Bottom entry chute
- IBC seismic certification
- OSHPD seismic approval

**Paralleling control functions**
- First Start Sensor™ system selects first genset to close to bus
- Phase lock loop synchronizer with voltage matching
- Sync check relay
- Isochronous kW and kVar load sharing
- Load govern control for utility paralleling
- Extended Paralleling (Base Load/Peak Shave) Mode
- Digital power transfer control, for use with a breaker pair to provide open transition, closed transition, ramping closed transition, peaking and base load functions

**AmpSentry AC protection**
- Configurable torque matching
- 3-phase AC current
- Frequency
- kW, kVar, power factor kVA (three phase and total)

**Engine data**
- DC voltage
- Engine speed
- Lube oil pressure and temperature
- Coolant temperature
- Comprehensive FAE data (where applicable)

**Other data**
- Genset model data
- Start attempts, starts, running hours, kW hours
- Load profile (operating hours at % load in 5% increments)
- Fault history
- Data logging and fault simulation (requires InPower)

**Standard control functions**

**Digital governing**
- Integrated digital electronic isochronous governor
- Temperature dynamic governing

**Digital voltage regulation**
- Integrated digital electronic voltage regulator
- 3-phase, 4-wire Line-to-Line sensing
- Configurable torque matching

**AmpSentry AC protection**
- AmpSentry protective relay
- Over current and short circuit shutdown
- Over current warning
- Single and three phase fault regulation
- Over and under voltage shutdown
- Over and under frequency shutdown
- Overload warning with alarm contact
- Reverse power and reverse Var shutdown
- Field overload shutdown

**PowerCommand 3.3 – control system**

An integrated microprocessor based generator set control system providing voltage regulation, engine protection, alternator protection, operator interface and isochronous governing. Refer to document S-1570 for more detailed information on the control.

**AmpSentry** – Includes integral AmpSentry protection, which provides a full range of alternator protection functions that are matched to the alternator provided.

**Power management** – Control function provides battery monitoring and testing features and smart starting control system.

**Advanced control methodology** – Three phase sensing, full wave rectified voltage regulation, with a PWM output for stable operation with all load types.

**Communications interface** – Control comes standard with PCCNet and Modbus interface.

**Regulation compliant** – Prototype tested: UL, CSA and CE compliant.

**Service** - InPower™ PC-based service tool available for detailed diagnostics, setup, data logging and fault simulation.

**Easily upgradeable** – PowerCommand controls are designed with common control interfaces.

**Reliable design** – The control system is designed for reliable operation in harsh environment.

**Multi-language support**

Standard control functions (continued)

Engine protection
- Battery voltage monitoring, protection and testing
- Overspeed shutdown
- Low oil pressure warning and shutdown
- High coolant temperature warning and shutdown
- Low coolant level warning or shutdown
- Low coolant temperature warning
- Fail to start (overcrank) shutdown
- Fail to crank shutdown
- Cranking lockout
- Sensor failure indication
- Low fuel level warning or shutdown

- Fuel-in-rupture-basin warning or shutdown
- Full authority electronic engine protection

Control functions
- Time delay start and cool down
- Real time clock for fault and event time stamping
- Exerciser clock and time of day start/stop
- Data logging
- Cycle cranking
- Load shed
- Configurable inputs and outputs (4)
- Remote emergency stop

Options
- Auxiliary output relays (2)
