Specification sheet

Diesel generator set
QSK60 series engine
2500 kVA 50 Hz
Data Center Continuous

Description
Cummins® commercial generator sets are fully integrated power generation systems providing optimum performance, reliability and versatility for stationary Standby applications.

Features
Data Center Continuous (DCC) - Applicable for supplying power continuously to a constant or varying electrical load for unlimited hours in a data center application.

Uptime compliant - Meets the requirement of a Tier III and IV data center site by being rated to run for unlimited hours of operation when loaded to 'N' demand for the engine generator set.

Cummins heavy-duty engine - Rugged 4-cycle industrial diesel delivers reliable power, low emissions and fast response to load changes.

Alternator - Offers selectable motor starting capability with low reactance 2/3 pitch windings, low waveform distortion with non-linear loads and fault clearing short-circuit capability.

Permanent Magnet Generator (PMG) - Offers enhanced motor starting and fault clearing short circuit capability.

Control system - The PowerCommand® digital control is standard equipment and provides total genset system integration including automatic remote starting/stopping, precise frequency and voltage regulation, alarm and status message display, AmpSentry™ protective relay, output metering, auto-shutdown at fault detection.

Cooling system - Standard integral set-mounted radiator systems, designed and tested for rated ambient temperatures, simplifies facility design requirements for rejected heat.

Warranty and service - Backed by a comprehensive warranty and worldwide distributor network.

ISO8528-5 G3 Capable - refer to factory for site and configuration specific transient performance classification

Generator set specifications

Governor regulation | ISO 8528 Part 1
Voltage regulation, no load to full load | ± 0.5%
Random voltage variation | ± 0.5%
Frequency regulation | Isochronous
Random frequency variation | ± 0.25%
EMS compatibility | EN61000-6-4/EN61000-6-2

Engine specifications

Bore | 159 mm (6.25 in.)
Stroke | 190 mm (7.48 in.)
Displacement | 60.2 litres (3673 in³)
Configuration | Cast iron, V 16 cylinder
Battery capacity | 2200 amps minimum at ambient temperature of 0 °C (32 °F)
Battery charging alternator | 55 amps
Starting voltage | 24 volts, negative ground
Fuel system | Cummins’ modular common rail system
Fuel filter | Two stage spin-on fuel filter and water separator system. Stage 1 has a three element, 7 micron filter and Stage 2 has a three element, 3 micron filter
Air cleaner type | Dry replaceable element
Lube oil filter type(s) | Four spin-on, combination full flow filter and bypass filters
Standard cooling system | High ambient cooling system

Alternator specifications

Design | Brushless, 4 pole, drip proof, revolving field
Stator | 2/3 pitch
Rotor | Two bearing, flexible disc
Insulation system | Class H on low and medium voltage, Class F on high voltage
Standard temperature rise | 150/40 °C Standby
Exciter type | Permanent Magnet Generator (PMG)
Phase rotation | A (U), B (V), C (W)
Alternator cooling | Direct drive centrifugal blower fan
AC waveform Total Harmonic Distortion (THDV) | < 5% no load to full linear load, < 3% for any single harmonic
Telephone Influence Factor (TIF) | < 50 per NEMA MG1-22.43
Telephone Harmonic Factor (THF) | < 3%

Available voltages

50 Hz Line – Neutral/Line – Line

| 220/380 | 255/440 | 3635/6300 | 6060/10500 |
| 230/400 | 1905/3300 | 3810/6600 | 6350/11000 |
| 240/416 |

Generator set options and accessories

Engine

- 120/240 V 300 W anti-condensation heater
- 208/240/480 V thermostatically controlled coolant heater for ambient above and below 4.5 °C (40 °F)
- Dual 120/208/240/480 V 300 W lube oil heaters
- Duplex fuel filter

Control panel

- PowerCommand 3.3
- Multiple language support
- 120/240 V 100 W control anti-condensation heater
- Exhaust pyrometer
- Ground fault indication
- Remote annunciator panel
- Paralleling relay package
- Shutdown alarm relay package
- Audible engine shutdown alarm
- AC output analog meters (bar graph)

Exhaust system

- Industrial grade exhaust silencer
- Residential grade exhaust silencer

Cooling system

- Standard high ambient temperature
- Remote RAD

Generator set

- PowerCommand 550 remote monitoring system
- Batteries
- Battery charger
- Manual language – English, Spanish, French and Chinese
- Spring isolators
- Oil sampling valve

*Note: Some options may not be available on all models - consult factory for availability.
PowerCommand 3.3 – control system

Control system
The PowerCommand control system is an integrated microprocessor based generator set control system providing voltage regulation, engine protection, alternator protection, operator interface and isochronous governing.

AmpSentry – Includes integral AmpSentry protection, which provides a full range of alternator protection functions that are matched to the alternator provided.

Power management – Control function provides battery monitoring and testing features and smart starting control system.

Advanced control methodology – Three phase sensing, full wave rectified voltage regulation, with a PWM output for stable operation with all load types.

Communications interface – Control comes standard with PCCNet and Modbus interface.

Regulation compliant – Prototype tested: UL, CSA, UKCA and CE compliant.

Service - InPower™ PC-based service tool available for detailed diagnostics, setup, data logging and fault simulation.

Reliable design – The control system is designed for reliable operation in harsh environment.

Multi-language support

Operator panel features
Operator panel features – The operator panel, in addition to the alternator, displays the Utility/AC Bus data.

Operator/display functions
- 320 x 240 pixels graphic LED backlight LCD
- Auto, manual, start, stop, fault reset and lamp test/panel lamp switches
- Alpha-numeric display with pushbuttons
- LED lamps indicating genset running, remote start, not in auto, common shutdown, common warning, manual run mode, auto mode and stop

Paralleling control functions
- Digital frequency synchronization and voltage matching
- Isochronous kW and kVar load sharing controls
- Droop kW and kVar control
- Sync check
- Extended paralleling (Peak Shave/Base Load)
- Digital power transfer control (AMF) provides load transfer operation in open or closed transition or soft (ramping) transfer mode

Alternator data
- Line-to-Neutral and Line-to-Line AC volts
- 3-phase AC current
- Frequency
- kW, kVar, power factor kVA (three phase and total)

Engine Data
- DC voltage
- Engine speed
- Lube oil pressure and temperature
- Coolant temperature
- Comprehensive FAE data (where applicable)

Other data
- Genset model data
- Start attempts, starts, running hours, kW hours
- Load profile (operating hours at % load in 5% increments)
- Fault history
- Data logging and fault simulation (requires InPower)

Standard control functions

Digital governing (optional)
- Integrated digital electronic isochronous governor
- Temperature dynamic governing

Digital voltage regulation
- Integrated digital electronic voltage regulator
- 3-phase, 4-wire Line-to-Line sensing
- Configurable torque matching

AmpSentry AC protection
- AmpSentry protective relay
- Over current and short circuit shutdown
- Over current warning
- Single and three phase fault regulation
- Over and under voltage shutdown
- Over and under frequency shutdown
- Overload warning with alarm contact
- Reverse power and reverse Var shutdown
- Field overload

Engine protection
- Battery voltage monitoring, protection and testing
- Over speed shutdown
- Low oil pressure warning and shutdown
- High coolant temperature warning and shutdown
- Low coolant level warning or shutdown
- Low coolant temperature warning
- Fail to start (over crank) shutdown
- Fail to crank shutdown
- Cranking lockout
- Sensor failure indication
- Low fuel level warning or shutdown
- Fuel-in-rupture-basin warning or shutdown
- Full authority electronic engine protection

Control functions
- Time delay start and cool down
- Real time clock for fault and event time stamping
- Exerciser clock and time of day start/stop
- Data logging
- Cycle cranking
- Load shed
- Configurable inputs and outputs (4)
- Remote emergency stop

Options
- Auxiliary output relays (2)
Do not use for installation design

**Codes and standards**

Codes may not be available with all model configurations – consult factory for availability

- **ISO 9001**
  - This generator set is designed in facilities certified to ISO 9001 and manufactured in facilities certified to ISO 9001 or ISO 9002.

- **CE**
  - The CE marking is only valid when equipment is used in a fixed installation application. Material compliance declaration is available upon request.

- **UKCA**
  - The UKCA marking is only valid when equipment is used in a fixed installation application. Material compliance declaration is available upon request.

**Warning**: Back feed to a utility system can cause electrocution and/or property damage. Do not connect to any building’s electrical system except through an approved device or after building main switch is open.
