Diesel generator set QSK23 series engine
680 kW – 725 kW 60 Hz
Data Center Continuous

Description
This Cummins® commercial generator set is a fully integrated power generation system, providing optimum performance, reliability, and versatility for stationary standby, prime power, and continuous duty applications.

Features
Data Center Continuous (DCC)℠ - Applicable for supplying power continuously to a constant or varying electrical load for unlimited hours in a data center application.

Uptime compliant - Meets the requirement of a Tier III and IV data center site by being rated to run for unlimited hours of operation when loaded to 'N' demand for the engine generator set.

ISO 8528-5 G3 Capable – Refer to factory for site and configuration specific transient performance classification

Cummins HHP engine - Rugged 4-cycle industrial diesel delivers reliable power, low emissions and fast response to load changes.

Permanent Magnet Generator (PMG) - Offers enhanced motor starting and fault clearing short circuit capability.

Alternator - Several alternator sizes offer selectable motor starting capability with low reactance 2/3 pitch windings; low waveform distortion with non-linear loads, fault clearing short-circuits capability, and class H insulation.

Cooling system - Standard integral set-mounted radiator system, designed and tested for rated ambient temperatures, simplifies facility design requirements for rejected heat.

Control system - Standard PowerCommand® electronic control provides total system integration including remote start/stop, precise frequency and voltage regulation, alarm and status message display, AmpSentry™ protection, output metering, auto-shutdown.

Warranty - Backed by a comprehensive warranty and worldwide distributor network.

Motorized circuit breaker - Optional 3 or 4 pole motorized circuit breaker available.

Enclosure - Optional sound attenuated enclosure is available.

### Available voltages

**60 Hz Line–Neutral/Line–Line**

- 120/208
- 127/220
- 220/380
- 230/380
- 240/416
- 255/440
- 277/480

### Generator set options and accessories

**Engine**

- Heavy duty air filter
- Medium duty air filter
- Water jacket heater 220/240 V

**Alternator**

- Alternator heater

**Cooling**

- Antifreeze 50/50 (ethylene glycol)
- Optional 50°C cooling radiator

**Circuit breaker**

- 3 or 4 pole main circuit breaker
- 3 or 4 pole motorized circuit breaker
- Aux contacts and trip alarm

**Control panel**

- PowerCommand 3.3
- PowerCommand 3.3 MLD
- Shutdown audible alarm
- Shunt trip – 24 VDC
- Shutdown - Ground/Earth Fault (Single Set)

**Warranty**

- 2 year Base for Data centre (DCC) applications

**Silencer**

- 9 dB attenuation critical silencer
- 25 dB residential – delivered loose

**Base Frame**

- 1250L integrated fuel tank
- 1000L integrated Fuel Tank

**Enclosure**

- Sound attenuated enclosure

Note: Some options may not be available on all models - consult factory for availability.

PowerCommand 3.3 (MLD) control system

The PowerCommand 3.3 control system is an integrated microprocessor based generator set control system providing voltage regulation, engine protection, alternator protection, operator interface and isochronous governing.

**AmpSentry** – includes integral AmpSentry protection, which provides a full range of alternator protection functions that are matched to the alternator provided.

**Power management** – Control function provides battery monitoring and testing features and smart starting control system.

**Advanced control methodology** – Three phase sensing, full wave rectified voltage regulation, with a PWM output for stable operation with all load types.

**Communications interface** – Control comes standard with PCCNet and Modbus interface.

**Regulation compliant** – Prototype tested: UL, CSA and CE compliant.

**Service** – InPower™ PC-based service tool available for detailed diagnostics, setup, data logging and fault simulation.

**Reliable design** – The control system is designed for reliable operation in harsh environment.

**Multi-language support**

**Operator panel features**

**Operator panel features** – The operator panel, in addition to the alternator, displays the Utility/AC Bus data.

**Operator/display functions**

- 320 x 240 pixels graphic LED backlight LCD
- Auto, manual, start, stop, fault reset and lamp test/panel lamp switches
- Alpha-numeric display with pushbuttons
- LED lamps indicating genset running, remote start, not in auto, common shutdown, common warning, manual run mode, auto mode and stop

**Paralleling control functions**

- Digital frequency synchronization and voltage matching
- Isochronous kW and kVar load sharing controls
- Droop kW and kVar control
- Sync check
- Extended paralleling (Peak Shave/Base Load)

**Digital power transfer control (AMF) provides load transfer operation in open or closed transition or soft (ramping) transfer mode**

**Alternator data**

- Line-to-Neutral and Line-to-Line AC volts
- 3-phase AC current
- Frequency
- kW, kVar, power factor kVA (three phase and total)

**Engine data**

- DC voltage
- Engine speed
- Lube oil pressure and temperature
- Coolant temperature
- Comprehensive FAE data (where applicable)

**Other data**

- Genset model data
- Start attempts, starts, running hours, kW hours

**Standard control functions**

**Digital governing (optional)**

- Integrated digital electronic isochronous governor
- Temperature dynamic governing

**Digital voltage regulation**

- Integrated digital electronic voltage regulator
- 3-phase, 4-wire Line-to-Line sensing
- Configurable torque matching

**AmpSentry AC protection**

- AmpSentry protective relay
- Over current and short circuit shutdown
- Over current warning
- Single and three phase fault regulation
- Over and under voltage shutdown
- Over and under frequency shutdown
- Overload warning with alarm contact
- Reverse power and reverse Var shutdown
- Field overload

**Engine protection**

- Battery voltage monitoring, protection and testing
- Over speed shutdown
- Low oil pressure warning and shutdown
- High coolant temperature warning and shutdown
- Low coolant level warning or shutdown
- Low coolant temperature warning
- Fail to start (over crank) shutdown
- Fail to crank shutdown
- Cranking lockout
- Sensor failure indication
- Low fuel level warning or shutdown
- Fuel-in-rupture-basin warning or shutdown
- Full authority electronic engine protection

**Control functions**

- Time delay start and cool down
- Real time clock for fault and event time stamping
- Exerciser clock and time of day start/stop
- Data logging
- Cycle cranking
- Load shed
- Configurable inputs and outputs (4)
- Remote emergency stop

**Options**

- Auxiliary output relays (2)

**Masterless Load Demand (MLD)**

- Load dependent start/stop of multi-gen system
- Predictive load input
- Run hour equalization

### Codes and standards

- **ISO 9001**
  - This generator set is designed in facilities certified to ISO 9001 and manufactured in facilities certified to ISO 9001 or ISO 9002.

- **CE**
  - This generator set is available with CE certification subject to EU RoHS exclusion per EU 2011/65.

- **CSA**
  - This generator set is available with CSA compliance to product class 4215-01 as an option.

- **ISO 8528**
  - This generator set has been designed to comply with ISO 8528 regulation.
