Specification sheet

Diesel generator set
VTA28 series engine
545 kW 60 Hz
Data Center Continuous

Description
This Cummins® commercial generator set is a fully integrated power generation system, providing optimum performance, reliability, and versatility for stationary Standby, Prime power, and Continuous duty applications.

Features

Data Center Continuous (DCC)SM - Applicable for supplying power continuously to a constant or varying electrical load for unlimited hours in a data center application.

Uptime compliant - Meets the requirement of a Tier III and IV data center site by being rated to run for unlimited hours of operation when loaded to ‘N’ demand for the engine generator set.

Cummins HHP engine - Rugged 4-cycle industrial diesel delivers reliable power, low emissions and fast response to load changes.

Permanent Magnet Generator (PMG) - Offers enhanced motor starting and fault clearing short circuit capability.

Alternator - Several alternator sizes offer selectable motor starting capability with low reactance 2/3 pitch windings; low waveform distortion with non-linear loads, fault clearing short-circuits capability, and class H insulation.

Cooling system - Standard integral set-mounted radiator system, designed and tested for rated ambient temperatures, simplifies facility design requirements for rejected heat.

Control system - Standard PowerCommand® electronic control provides total system integration including remote start/stop, precise frequency and voltage regulation, alarm and status message display, AmpSentry™ protection, output metering, auto-shutdown.

Warranty and service - Backed by a comprehensive warranty and worldwide distributor network.

Motorized circuit breaker – Optional 3 or 4 pole motorized circuit breaker available.

ISO 8528-5 G3 Capable – Refer to factory for site and configuration specific transient performance classification.

Generator set specifications

Genset performance class | ISO 8528-5 compliant
Voltage regulation, no load to full load | ± 0.5%
Random voltage variation | ± 0.5%
Frequency regulation | Isochronous
Random frequency variation | ± 0.25%
EMS compatibility | EN61000-6-4/EN61000-6-2

Engine specifications

Design | 4 cycle, in-line, turbocharged and after-cooled
Bore | 139.7 mm (5.5 in.)
Stroke | 152.4 mm (6 in.)
Displacement | 28 L (1710 in³)
Cylinder block | Cast iron with replaceable wet cylinder liners, 40° V12 cylinder
Battery capacity | 660 amps at ambient temperature 32 °F (0 °C)
Battery charging alternator | 35 Amps
Starting voltage | 24 volt, negative ground
Fuel system | Direct injection
Fuel filter | Spin on fuel filters with water separator
Air cleaner type | Dry replaceable element with restriction indicator
Lube oil filter type(s) | Three spin on full flow
Standard cooling system | 122 ºF (40 ºC) ambient radiator

Alternator specifications

Design | Brushless, 4 pole, drip-proof revolving field
Stator | 2/3 pitch
Rotor | Direct coupled by flexible disc
Insulation system | Class H
Standard temperature rise | 150 ºC
Exciter type | Permanent Magnet Generator (PMG)
Phase rotation | A (U), B (V), C (W)
Alternator cooling | Direct drive centrifugal blower fan
AC waveform Total Harmonic Distortion (THDV) | No load < 1.5%. Non distorting balanced linear load < 5%
Telephone Influence Factor (TIF) | < 50%
Telephone Harmonic Factor (THF) | < 2%

Available voltages

60 Hz Line – Neutral/Line - Line
- 120/208
- 127/200
- 220/380
- 230/400
- 240/416
- 277/480
- 225/440

*Derate may be applicable at this voltage. Please consult factory for details.

Generator set options

Engine
- Heavy duty air filter
- Water jacket heater 220/240

Alternator
- Alternator heater
- Exciter voltage regulator (PMG)

Cooling
- Antifreeze 50/50 (Ethylene glycol)

Circuit breaker
- 3 or 4 pole manual circuit breaker
- 3 or 4 pole motorized circuit breaker
- Aux contacts and trip alarm
- Control panel
- PowerCommand 3.3
- PowerCommand 3.3 MLD
- Shutdown audible alarm
- Shunt trip – 24 VDC

Warranty
- 2 year Base for Data centre (DCC) applications
- Silencer
- 9 dB attenuation industrial silencer
- 25 dB residential delivered loose

Our energy working for you.*

**PowerCommand 3.3 (MLD)**

The PowerCommand 3.3 control system is an integrated microprocessor based generator set control system providing voltage regulation, engine protection, alternator protection, operator interface and isochronous governing.

**AmpSentry** — Includes integral AmpSentry protection, which provides a full range of alternator protection functions that are matched to the alternator provided.

**Power management** — Control function provides battery monitoring and testing features and smart starting control system.

**Advanced control methodology** — Three phase sensing, full wave rectified voltage regulation, with a PWM output for stable operation with all load types.

**Communications interface** — Control comes standard with PCCNet and Modbus interface.

**Regulation compliant** — Prototype tested: UL, CSA and CE compliant.

**Service** - InPower™ PC-based service tool available for detailed diagnostics, setup, data logging and fault simulation.

**Reliable design** — The control system is designed for reliable operation in harsh environment.

**Multi-language support**

**Operator panel features** — The operator panel, in addition to the alternator, displays the Utility/AC Bus data.

**Operator/display functions**
- 320 x 240 pixels graphic LED backlight LCD
- Auto, manual, start, stop, fault reset and lamp test/panel lamp switches
- Alpha-numeric display with pushbuttons
- LED lamps indicating genset running, remote start, not in auto, common shutdown, common warning, manual run mode, auto mode and stop

**Paralleling control functions**
- Digital frequency synchronization and voltage matching
- Isochronous kW and kVar load sharing controls
- Droop kW and kVar control
- Sync check
- Extended paralleling (peak shave/base load)
- Digital power transfer control (AMF) provides load transfer operation in open or closed transition or soft (ramping) transfer mode

**Alternator data**
- Line-to-Neutral and Line-to-Line AC volts
- 3-phase AC current
- Frequency
- kW, kVar, power factor kVA (three phase and total)

**Engine data**
- DC voltage
- Engine speed
- Lube oil pressure and temperature
- Coolant temperature
- Comprehensive FAE data (where applicable)

**Other data**
- Genset model data
- Start attempts, starts, running hours, kW hours

- Load profile (operating hours at % load in 5% increments)
- Fault history
- Data logging and fault simulation (requires InPower)

**Standard control functions**

**Digital governing (optional)**
- Integrated digital electronic isochronous governor
- Temperature dynamic governing

**Digital voltage regulation**
- Integrated digital electronic voltage regulator
- 3-phase, 4-wire Line-to-Line sensing
- Configurable torque matching

**AmpSentry AC protection**
- AmpSentry protective relay
- Over current and short circuit shutdown
- Over current warning
- Single and three phase fault regulation
- Over and under voltage shutdown
- Over and under frequency shutdown
- Overload warning with alarm contact
- Reverse power and reverse Var shutdown
- Field overload

**Engine protection**
- Battery voltage monitoring, protection and testing
- Over speed shutdown
- Low oil pressure warning and shutdown
- High coolant temperature warning and shutdown
- Low coolant level warning or shutdown
- Low coolant temperature warning
- Fail to start (over crank) shutdown
- Fail to crank shutdown
- Cranking lockout
- Sensor failure indication
- Low fuel level warning or shutdown
- Fuel-in-rupture-basin warning or shutdown
- Full authority electronic engine protection

**Control functions**
- Time delay start and cool down
- Real time clock for fault and event time stamping
- Exerciser clock and time of day start/stop
- Data logging
- Cycle cranking
- Load shed
- Configurable inputs and outputs (4)
- Remote Emergency stop

**Options**
- Auxiliary output relays (2)

**Masterless Load Demand (MLD)**
- Load dependent start/stop of multi-gen system
- Predictive load input
- Run hour equalization
This outline drawing is to provide representative configuration details for Model series only. See respective model data sheet for specific model outline drawing number.

Do not use for installation design

**Codes and standards**

- **ISO 9001**
  This generator set is designed in facilities certified to ISO 9001 and manufactured in facilities certified to ISO 9001 or ISO 9002.

- **CE**
  This generator set is available with CE certification subject to EU RoHS exclusion per EU 2011/65.

- **2000/14/EC**
  All enclosed products are designed to meet or exceed EU noise legislation 2000/14/EC step 2006.

- **ISO 8528**
  This generator set has been designed to comply with ISO 8528 regulation.
