Diesel generator set
QST30 series
engine
680 kW - 1000 kW 60 Hz
Data Center Continuous

Description
Cummins® commercial generator sets are fully integrated power generation systems providing optimum performance, reliability and versatility for stationary Standby and Prime Power applications.

Features

Data Center Continuous (DCC) - Applicable for supplying power continuously to a constant or varying electrical load for unlimited hours in a data center application.

Uptime Compliant - Meets the requirement of a Tier III and IV data center site by being rated to run for unlimited hours of operation when loaded to 'N' demand for the engine generator set.

Cummins heavy-duty engine - Rugged 4-cycle, industrial diesel delivers reliable power, low emissions and fast response to load changes.

Alternator - Several alternator sizes offer selectable motor starting capability with low reactance 2/3 pitch windings, low waveform distortion with non-linear loads and fault clearing short-circuit capability.

Permanent Magnet Generator (PMG) - Offers enhanced motor starting and fault clearing short circuit capability.

Circuit breakers - Option for manually-and/or electrically-operated circuit breakers.

Control system - The PowerCommand® electronic control is standard equipment and provides total genset system integration including automatic remote starting/stopping, precise frequency, and voltage regulation, alarm and status message display, AmpSentry™ protection, output metering, auto-shutdown at fault detection and NFPA 110 Level 1 compliance.

Masterless paralleling - An optional electrically operated circuit breaker can be added for a simple masterless paralleling solution.

Cooling system - Standard integral set-mounted radiator system, designed and tested for rated ambient temperatures, simplifies facility design requirements for rejected heat.

NFPA - The generator set accepts full rated load in a single step in accordance with NFPA 110 for Level 1 systems.

Warranty and service - Backed by a comprehensive warranty and worldwide distributor network.

Generator set specifications

Governor regulation class | ISO8528 Part 1 Class G3
Voltage regulation, no load to full load | ± 0.5%
Random voltage variation | ± 0.5%
Frequency regulation | Isochronous
Random frequency variation | ± 0.25%
Radio frequency emissions compliance | IEC 61000-4-2: level 4 electrostatic discharge
| IEC 61000-4-3: level 3 radiated susceptibility

Engine specifications

Bore | 140 mm (5.51 in)
Stroke | 165.0 mm (6.5 in)
Displacement | 30.5 liters (1860 in³)
Configuration | Cast iron, V, 12 cylinder
Battery capacity | 1800 amps minimum at ambient temperature of -18 °C to 0 °C (0 °F to 32 °F)
Battery charging alternator | 35 amps
Starting voltage | 24 volt, negative ground
Fuel system | Direct injection: number 2 diesel fuel, fuel filter, automatic electric fuel shut off
Fuel filter | Triple element, 10 micron filtration, spin-on fuel filters with water separator
Air cleaner type | Dry replaceable element
Lube oil filter type(s) | Four spin-on, combination full flow filter and bypass filters
Standard cooling system | High ambient radiator

Alternator specifications

Design | Brushless, 4 pole, drip proof, revolving field
Stator | 2/3 pitch
Rotor | Single bearing flexible discs
Insulation system | Class H on low and medium voltage, Class F on high voltage
Standard temperature rise | 150 °C Standby at 40 °C ambient
Exciter type | Permanent Magnet Generator (PMG)
Phase rotation | A (U), B (V), C (W)
Alternator cooling | Direct drive centrifugal blower fan
AC waveform Total Harmonic Distortion (THDV) | < 5% no load to full linear load, < 3% for any single harmonic
Telephone Influence Factor (TIF) | < 50 per NEMA MG1-22.43
Telephone Harmonic Factor (THF) | < 3

Available voltages

60 Hz Line-Neutral/Line-Line
- 120/208
- 220/380
- 240/416
- 277/480
- 230/400
- 347/600
- 347/600
- 277/480

Generator set options and accessories

Engine
- 208/240/480 V coolant heater for ambient above 4.5 °C (40 °F)
- 208/240/480 V coolant heater for ambient below 4.5 °C (40 °F)

Alternator
- 80 °C rise
- 105 °C rise
- 125 °C rise
- 120/240 V 300 W, anti-condensation heater
- Temperature sensor - RTDs, 2/phase
- Temperature sensor – alternator bearing RTD
- Differential current transformers

Control Panel
- PowerCommand 3.3 with Masterless Load Demand (MLD)
- Run relay package
- Ground fault indication
- Paralleling configuration
- Remote fault signal package
- Exhaust gas temperature sensor
- 120/240 V 100 W control anti-condensation heater

Cooling system
- Remote radiator

Generator set options and accessories (continued)

**Exhaust System**
- Industrial grade exhaust silencer
- Residential grade exhaust silencer
- Critical grade exhaust silencer

**Generator set**
- AC entrance box
- Battery
- Battery rack with hold-down - floor standing
- Circuit breaker - set mounted
- Disconnect switch - set mounted
- PowerCommand network
- Remote annunciator panel
- Spring isolators
- 2 year warranty
- 5 year warranty
- 10 year major components warranty

Note: Some options may not be available on all models - consult factory for availability.

**PowerCommand 3.3 – control system**

An integrated microprocessor based generator set control system providing voltage regulation, engine protection, alternator protection, operator interface and isochronous governing. Refer to document S-1570 for more detailed information on the control.

**AmpSentry** - Includes integral AmpSentry protection, which provides a full range of alternator protection functions that are matched to the alternator provided.

**Power management** - Control function provides battery monitoring and testing features and smart starting control system.

**Advanced control methodology** - Three phase sensing, full wave rectified voltage regulation, with a PWM output for stable operation with all load types.

**Communications interface** - Control comes standard with PCCNet and Modbus interface.

**Regulation compliant** - Prototype tested: UL, CSA and CE compliant.

**Service** - InPower™ PC-based service tool available for detailed diagnostics, setup, data logging and fault simulation.

**Easily upgradeable** - PowerCommand controls are designed with common control interfaces.

**Reliable design** - The control system is designed for reliable operation in harsh environment.

**Multi-language support**

**Operator panel features**

**Operator/display functions**
- Displays paralleling breaker status
- Provides direct control of the paralleling breaker
- 320 x 240 pixels graphic LED backlight LCD
- Auto, manual, start, stop, fault reset and lamp test/panel lamp switches
- Alpha-numeric display with pushbuttons
- LED lamps indicating generator set running, remote start, not in auto, common shutdown, common warning, manual run mode, auto mode and stop

**Paralleling control functions**
- First Start Sensor™ system selects first generator set to close to bus
- Phase lock loop synchronizer with voltage matching
- Sync check relay
- Isochronous kW and kVar load sharing

**Load govern control for utility paralleling**
**Extended paralleling (Base Load/Peak Shave) mode**
**Digital power transfer control, for use with a breaker pair to provide open transition, closed transition, ramping closed transition, peaking and base load functions**

**Alternator data**
- Line-to-Neutral and Line-to-Line AC volts
- 3-phase AC current
- Frequency
- kW, kVA, power factor kVA (three phase and total)

**Engine data**
- DC voltage
- Engine speed
- Lube oil pressure and temperature
- Coolant temperature
- Comprehensive FAE data (where applicable)

**Other data**
- Genset model data
- Start attempts, starts, running hours, kW hours
- Load profile (operating hours at % load in 5% increments)
- Fault history
- Data logging and fault simulation (requires InPower)

**Standard control functions**

**Digital governing**
- Integrated digital electronic isochronous governor
- Temperature dynamic governing

**Digital voltage regulation**
- Integrated digital electronic voltage regulator
- 3-phase, 4-wire Line-to-Line sensing
- Configurable torque matching

**AmpSentry AC protection**
- AmpSentry protective relay
- Over current and short circuit shutdown
- Over current warning
- Single and three phase fault regulation
- Over and under voltage shutdown
- Over and under frequency shutdown
- Overload warning with alarm contact
- Reverse power and reverse Var shutdown
- Field overload shutdown

**AmpSentry protective relay**
- Over current and short circuit shutdown
- Over current warning
- Single and three phase fault protection
- Over and under voltage protection
- Over and under frequency protection
- Overload protection with alarm contact
- Reverse power and reverse Var protection
- Field overload protection

**Our energy working for you.**

power.cummins.com
Engine protection
- Battery voltage monitoring, protection and testing
- Overspeed shutdown
- Low oil pressure warning and shutdown
- High coolant temperature warning and shutdown
- Low coolant level warning or shutdown
- Low coolant temperature warning
- Fail to start (overcrank) shutdown
- Fail to crank shutdown
- Cranking lockout
- Sensor failure indication
- Low fuel level warning or shutdown
- Fuel-in-rupture-basin warning or shutdown
- Full authority electronic engine protection

Control functions
- Time delay start and cool down
- Real time clock for fault and event time stamping
- Exerciser clock and time of day start/stop
- Data logging
- Cycle cranking
- Load shed
- Configurable inputs and outputs (4)
- Remote emergency stop

Options
- Auxiliary output relays (2)

This outline drawing is to provide representative configuration details for Model series only. See respective model data sheet for specific model outline drawing number. Do not use for installation design
